Soft Skills: Problem Solving, Communication, Team Collaboration, Adaptability, Attention to Detail, Eager to Learn.

Experience:

Freelance Frontend Developer (2023 – Present)

- Developed and delivered 8+ responsive and interactive web projects using HTML5, CSS3, JavaScript (ES6+), React, and Tailwind CSS.
- Integrated 5+ REST APIs for dynamic data handling, forms, and real-time updates.
- Improved page load performance by 25% – 30% through optimized CSS, reusable components, and clean code practices.
- Built fully responsive layouts supporting mobile, tablet, and desktop with cross-browser compatibility.
- Managed projects end-to-end, reducing revision cycles by 30% through clear communication and structured workflows.

Education:

Diploma in Health Technical Institute, Medical Registration & Statistics – Al-Azhar University, Cairo (2021)

Projects:

1. Rayan Agricultural Consulting **LiveDemo | GitHub**

Tech Stack: React.js, CSS (Grid & Flexbox), Supabase, REST API.

- Corporate website presenting services and farms with responsive design and bilingual support (Arabic & English).
- Contact form integrated with Supabase; includes interactive maps and social links.

2. E-commerce Website Using Pure JavaScript **LiveDemo | GitHub**

Tech Stack: HTML, CSS, JavaScript.

- Simple e-commerce website with account creation, login, product browsing, cart, and favorites. Fully responsive design.
- Data stored in localStorage, supports search and filtering.

3. Weather & Prayer Times **GitHub**

Tech Stack: HTML, CSS, JavaScript, React, Axios.

- App displaying current weather, forecasts, and prayer times based on user location.
- Supports bilingual interface (Arabic & English) and works across devices.
- API integration via Axios (OpenWeather & Aladhan).

4. Products CRUD System **GitHub**

Tech Stack: HTML, CSS, JavaScript.

- Web system for creating, reading, updating, and deleting products, with search and quantity control.
- Fully integrated with Supabase using Fetch API.

5. Magic Dental Lab **LiveDemo | GitHub**

Tech Stack: React, Tailwind CSS, Formik, EmailJS, JavaScript.

- Interactive, responsive, and bilingual website showcasing dental lab services, location, and contact methods.
- Contact form integrated with EmailJS; includes gallery and social links.
